Jancewicz & Sons  
8 Morgan Street  
Bellows Falls, VT 05101

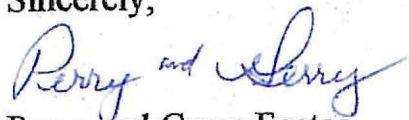

Just wanted to let you all know how pleased we are with the job Randy, Mike and Billy did on our roof at 663 Depot Street in Chester Depot. It turned out to be quite a challenge with trim boards that needed replacing and plywood reinforcement needed on a good share of the roof boards. In addition they had hornets nests to deal with – and worst of all, very hot weather. Never was a complaint heard and they worked harder than any group of men I have ever seen.

Randy is an excellent foreman, and he was always willing to explain everything thoroughly, especially carefully going over all the additional work that was needed. All three fellows worked together like a most capable team, and you could tell that they really cared what you thought of all that was being done. Jancewicz is lucky indeed to have employees like this.

Oh, last but not least, Randy came up with a life saving idea for an old fashioned entrance over the cellar door. It had a flat roof which had rot around the edges (and maybe more). After what repairs had to be made, he built a little A-Frame roof over it – and it just dresses up the whole place. It's probably my favorite part of the whole job!

Please give these guys an extra pat on the back the next time you see them; they sure deserve it!

Sincerely,

  
Perry and Gerry Foster
